

## Special Issue

# Reduction of Mycotoxin Contamination in Agrofood Chains

### Message from the Guest Editors

Mycotoxins are fungal secondary metabolites and are contaminant of several feed and food chains. They have deleterious effects on humans and animals. Mycotoxin contamination can take place at all stages of the supply chain (from the field to the processing of raw materials, including storage). The focus of this Special Issue of *Toxins* is on the most recent advances related to the reduction of mycotoxin concentration in food and feed agrofood chains. Manuscripts that provide data on mechanisms aiming to reduce fungal growth and degrade or eliminate contaminating mycotoxins are invited. Works on new developments in food control leading to the reduction of mycotoxin concentration are also welcome. Particular attention will be devoted to works highlighting the modes of action allowing the reduction of mycotoxin concentration in the final products.

## About the Journal

### Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
