

Special Issue

Mycotoxins: Decontamination and Adsorption

Message from the Guest Editor

This Special Issue of *Toxins* is devoted to recent advances in mycotoxin decontamination and adsorption studies. Topics of interest will especially include new solutions in mycotoxin-binding materials, in vitro tests on mycotoxin-binding efficiency, gastro-intestinal digestion studies on the stability of the mycotoxin-adsorbent complexes, and in vivo studies on reducing the toxic effect of mold secondary metabolites in the presence of different adsorbents or biotransformation agents. I sincerely invite you to share with the readers the most important achievements of your research work.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
