

Special Issue

Mycotoxins Study: Identification and Control

Message from the Guest Editors

Mycotoxins are more and more seriously associated with food safety and feed quality, ultimately posing more threats to human beings and animals. Of those, identification and control are the key points to the research topic of mycotoxin study at the global level. On this Special Issue, we invite the submissions covering the analytical methods for new mycotoxins, or emerging mycotoxins with high risk via biological, chemical, or physical approaches, and the novel strategies for the target mycotoxins, in foods and feed, or even the intermediate substances in the involved chain.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
