Toxic Effect of Mycotoxins

Message from the Guest Editor

Recent studies have associated the toxicity of regulated mycotoxins and the development and/or aggravation of known diseases, particularly when associated with other factors such as stress or obesity as well as other pathogens or toxicants. Likewise, it is becoming evident that several mycotoxins have insidious toxic effects under sub-acute and chronic exposure conditions. However, the exact mechanisms leading to such effects are poorly understood. We look forward to receiving your contributions for this Special Issue in the form of original research or review papers aiming at advancing the knowledge of the toxicity of any mycotoxin(s) in any species, alone or in combination. Original research articles or reviews on toxicity screening methodology development, including biomarkers of effect, are also welcome.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
