

# Special Issue

## Snake Bite and Related Injury

### Message from the Guest Editor

The present Special Issue focuses on the diverse topic of snake bites and related injuries, addressing incidents involving front-fanged snakes such as Viperidae, Elapidae, and Atractaspidae, as well as non-front-fanged colubroid (NFFC) snakes from around the world. The Special Issue welcomes research articles, reviews, short notes, and case reports that explore snake bite incidents in both human and veterinary contexts, including pets such as dogs and cats, as well as livestock. Contributions examining epidemiological aspects, as well as societal perceptions of snakes and snake bites, are also encouraged. By featuring a range of studies, this issue aims to enhance the understanding of snake bite management, treatment strategies, prevention measures, and public health implications.

## About the Journal

### Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
