

Special Issue

Editorial Board Members' Collection: Occurrence, Climate Change, Crop Intensification, Biological Invasions, and Epidemics in Global Mycotoxin Challenge

Message from the Guest Editors

This Special Issue aims to showcase recent advances in mycotoxin-producing plant pathogens. We are welcoming submissions on mycotoxin occurrence and its possible increase, with a specific focus on how climate change, crop intensification procedures, and global commerce are paving the way for mycotoxin-producing fungi “invasions”, recrudescence, and/or re-emergence. We invite you to submit your recent findings related to these topics and novel tools to measure, track, and limit the diffusion of mycotoxin-producing fungi.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology, University of Virginia, Charlottesville, VA,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
