Histological Effects of Endotoxins

Message from the Guest Editors

Endotoxins have an outstanding clinical, pharmaceutical, and laboratory impact, and for this reason the study of endotoxins has gained considerable attention in the literature recently, with an increasing number of both descriptive and experimental papers on the matter. Nonetheless, further investigation is required, mainly on their organic toxicity. Accordingly, we encourage researchers to devote work to this field and to conduct research on their histological effects. We put forward a very good opportunity in the form of a *Toxins* Special Issue focused on the “Histological Effects of Endotoxins”, and we are very pleased to kindly invite you to participate by sending an article on the topic, including the methodology in the field, to be published in this prestigious journal.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
