Mycotoxin Exposure: Assessment, Corresponding Adverse Health Outcomes and Control Plans

Message from the Guest Editor

Mycotoxins represent a challenging issue in almost all countries, causing a serious burden from safety, agronomic and economic perspectives. This is due to several factors, such as the agricultural practices adopted, the presence of more risky food habits or the very high levels of unawareness of the risk of these toxic compounds by consumers. Therefore, it is imperative to reduce the exposure of human beings and animals as much as possible, by minimising the presence of these toxic compounds from the field onwards by a systematic adoption of specific preventive methods. Based on this premise, the aim of this Special Issue is to collect innovative updated papers dealing with the exposure of consumers and/or animals to mycotoxins, focusing on possible adverse health outcomes consistent with exposure to mycotoxins and the outputs of tailored monitoring and surveillance plans, highlighting possible areas, already known or new, of criticalities. This information should help join the three vertices of the triangle of factors underlying the mycotoxin risk, i.e., minimisation, prevention, and exposure.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
