Snakebite Clinics and Pathogenesis: From Preclinical to Resource Mapping Studies

Message from the Guest Editors

Dear colleagues, The issue of snakebite envenoming has been overlooked for many years, despite 2.7 million incidences of envenoming and about 81,000–138,000 deaths each year. In 2017, the World Health Organization (WHO) recognized the enormous health and economic impact associated with snakebite envenoming and consequently reintroduced it into its list of Category A Neglected Tropical Diseases (NTDs). Clinical toxicology research groups, more specifically Toxinologists, are focusing their efforts on improving the understanding of various aspects of snakebite envenomings, ranging from basic biochemical and pharmacological studies to clinical aspects of envenoming and its therapies. This Special Issue has one main goal: to disseminate knowledge of snakebite envenoming at a clinical level. Reviews and research papers of clinical aspects are welcomed. We look forward to receiving your contributions. Dr. Manu Pucca

Dr. Hui Wen Fan

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
