

Special Issue

Snakebite and Clinical Toxinology

Message from the Guest Editors

Snakebite is a major neglected tropical disease and the global snakebite burden is huge, with the highest rates of snakebite envenomation and death occurring in South Asia, Southeast Asia, and sub-Saharan Africa. For example, India reports 81,000 snake envenomation cases with nearly 11,000 deaths each year. Although antivenoms were developed to treat snakebite patients, mortality or profound morbidity remain an issue. Developing novel strategies for the clinical diagnosis, treatment, or prediction of patients' prognosis in the event of snakebites may provide better care for snakebite patients. This Special Issue aims to publish original research articles, reviews, and short communications in the broad area of snakebites and clinical toxicology research. Since *Toxins* is a well-known journal in this field, we strongly believe that the articles published in this issue will reach a wide audience and aid in the development of better diagnostic and therapeutic strategies for snakebites.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
