Toxinologic and Pharmacological Investigation of Venomous Arthropods

Message from the Guest Editors

Chemical and pharmacological investigation of arthropod venoms have been one of the major aspects of Toxinology that have made it possible for molecular pharmaceutical intervention to treat, for instance, chronic pain, immunological and neurological disorders, and infections caused by multi-drug resistant microbes. In recent years, remarkable progress of analytical methods by mass spectroscopy combined with transcriptomic and proteomic approaches, as well as with other “omics” methodologies, like metabolomics, made it possible to reveal the diversity and usefulness of the venom components from some tiny arthropod species. This new Special Issue is a sequel to the previously published Special Issue “Arthropod Venom Components and their Potential Usage”. Hence, we would like to collect and combine in this companion Special Issue state-of-the-art progress that results from chemical, biological, and pharmacological research of arthropod venoms.

About the Journal

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Editor-in-Chief

Prof. Dr. Jay Fox

USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
