New Horizons in Transplantation Research: A Review Series

Message from the Guest Editors

Organ and cell transplantation have revolutionized the treatment of end-stage organ failure and various hematological disorders. As the field continues to evolve, significant advances in immunology, regenerative medicine, precision diagnostics, and immunosuppressive strategies are opening new frontiers and transforming clinical outcomes. This Special Issue series, *New Horizons in Transplantation Research: A Review Series*, brings together leading experts to provide comprehensive and insightful overviews of the latest developments, persistent challenges, and emerging opportunities in transplantation science. From innovative approaches to graft tolerance and immune monitoring, to breakthroughs in xenotransplantation, organ preservation, and bioengineering, each review is designed to serve as a valuable resource for researchers, clinicians, and students alike. By highlighting both the progress made and the pressing questions that remain, this series aims to inspire further innovation and interdisciplinary collaboration, ultimately advancing the future of transplantation medicine.

Guest Editors

Prof. Dr. Maurizio Salvadori

Department of Transplantation—Renal Unit, Careggi University Hospital, 50139 Florence, Italy

Prof. Dr. Gaetano Ciancio

Department of Urology, Division of Transplant Surgery, Miami Transplant Institute—Jackson Memorial Hospital, Miami, FL, USA

Deadline for manuscript submissions

15 March 2026

Author Benefits

High Visibility:

indexed within Scopus, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 38.9 days after submission; acceptance to publication is undertaken in 8.1 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
