Emergency Trauma Care: The Role of Telemedicine and m-Health Applications

Message from the Guest Editors

Novelty electronic and mobile technology is increasing in demand for fulfilling global health needs, especially in the pandemic era. Emergency trauma care faces critical barriers, especially in rural and less developed areas, regarding the accessibility of care, human manpower, and physical resources. Mobile health and telemedicine have proven to bridge these gaps, especially during the early management of the COVID era. New initiatives promoting the use of these technologies in the acute or early phase of trauma management support the highest level of expertise and care, even in the most remote settings. This Special Issue aims to present primary and secondary studies, including experimental, quasi-experimental, and observational studies related to the use of mobile health and telemedicine initiatives in the management of trauma care worldwide. Given your expertise and contributions to this area of science, I encourage you to submit your work to this Special Issue to make your findings available for the emergency and trauma medicine community worldwide.

Guest Editors

Prof. Dr. Andres M. Rubiano

Neurosciences Institute, INUB-MEDITECH Research Group, El Bosque University, 113033 Bogotá, Colombia

Dr. Shaheem De Vries

Emergency Medical Service System, Cape Town, South Africa

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Zsolt J. Balogh

1. School of Medicine and Public Health, University of Newcastle,
Newcastle, NSW 2308, Australia

2. Department of Surgery, John Hunter Hospital, Newcastle, NSW 2305,
Australia

Author Benefits

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 45.3 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.

Companion journal:

Healthcare.
