Leishmaniasis: Advances, Challenges, and Strategies in Combatting a Neglected Disease

Message from the Guest Editors

Leishmaniasis, a vector-borne disease caused by protozoa of the genus *Leishmania*, remains a significant global health concern. The disease presents in multiple forms, each with its unique clinical manifestations, epidemiological characteristics, and therapeutic challenges. This Special Issue will center on the intricate facets of leishmaniasis, highlighting the interdisciplinary nature of research required to comprehensively understand and combat it. Our intention is to cast a wide net, capturing a spectrum of research from the foundational biology of the *Leishmania* parasite to the broader socio-economic implications of the disease. We invite submissions that delve into molecular mechanisms, transmission dynamics, diagnostics, and therapeutic interventions. Beyond the science, we are keen on exploring the disease's impact on endemic communities, public health strategies for its control, and the policies that shape these strategies. With leishmaniasis affecting multiple regions globally, we also encourage comparative studies, shedding light on regional disparities in disease presentation, management, and outcomes.

Guest Editors

Dr. Bruno Cacopardo

Department of Clinical and Experimental Medicine, University of Catania, Catania, Italy

Dr. Andrea Marino

Infectious Diseases Unit, Department of Clinical and Experimental Medicine, ARNAS Garibaldi Hospital, University of Catania, 95122 Catania, Italy

Deadline for manuscript submissions

closed (20 February 2025)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the second half of 2024).
