

Special Issue

Infectious Diseases, Health and Climate Change

Message from the Guest Editor

This Special Issue focuses on multidisciplinary research on infectious diseases and climate change, exploring biological, environmental, and socio-economic impacts. Topics include: climate's effect on vector-borne, water-borne, food-borne, and zoonotic diseases; extreme weather's role in disease outbreaks; disease forecasting; and implications for vulnerable populations. We invite contributions using epidemiological studies, climate modeling, public health interventions, and policy analyses. Emphasis is on actionable insights for mitigation, adaptation, and health system preparedness. Our goal is to provide a platform for cutting-edge research, foster interdisciplinary collaboration, and inform policymakers, healthcare providers, and researchers on navigating climate-driven health challenges.

Guest Editor

Dr. Bryan Nyawanda

Swiss Tropical and Public Health Institute, 4051 Basel, Switzerland

Deadline for manuscript submissions

31 October 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
