

Special Issue

Global Burden of Viral Hepatitis

Message from the Guest Editors

The burden caused by viral hepatitis remains high in several populations and is predicted to remain a significant public health problem in the near future. However, up-to-date studies estimating the burden of viral hepatitis from different perspectives, including epidemiology, diagnosis, pathogenesis, natural history, linkage to care, treatment and prevention, are important to assess the current state of viral hepatitis and progress in the prevention and control efforts at national, regional and global levels. This Special Issue, the “Global Burden of Viral Hepatitis”, aims to assemble a novel collection of valuable resources for the medical and scientific community. Contributions in the form of original research, short communications and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
