Progress in Pneumonia and Pneumococcal Research

Message from the Guest Editor

Pneumonia continues to be a major cause of morbidity and mortality, particularly affecting the elderly and young children globally. *Streptococcus pneumoniae* is a common bacterial pathogen for pneumonia, despite the availability of pneumococcal vaccines. The aim of this Special Issue is to compile the recent research related to pneumonia and pneumococcal diseases on various aspects, including immunology, pathogenesis, clinical research, epidemiology, vaccines, and antibiotic resistance, in order to provide fresh perspectives on these topics. We welcome original research work, comprehensive reviews, and case studies.

Guest Editor

Dr. Bhim Gopal Dhoubhadel

Department of Respiratory Infections, Institute of Tropical Medicine, Nagasaki University, 1-12-4 Sakamoto, Nagasaki 852-8523, Japan

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
