Advances in Parasitic Neglected Tropical Diseases

Message from the Guest Editor

Neglected tropical diseases (NTDs) are caused by a variety of pathogens (including viruses, bacteria, parasites, fungi and toxins) and are associated with devastating health, social and economic consequences. Diseases caused by parasites account for a large proportion of NTDs and are a serious threat to humans, especially in low- and middle-income countries. For this Special Issue, we invite scholars to discuss the future development of parasitic neglected tropical diseases in regard to parasite/host interaction, disease diagnosis, drug treatment, prevention, control, monitoring and epidemiology. One Health perspectives on the topic are also welcomed.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
