

## Special Issue

# Current Visceral Leishmaniasis Research

### Message from the Guest Editors

Leishmaniasis are neglected tropical diseases with high impact on public health. Meanwhile, visceral leishmaniasis affects animal health as well. In some regions, the disease continues to spread, both in terms of the number of cases and the geographic distribution of the infection. Understanding the dynamics of such diseases, including their respective hosts and vectors, will help to improve prevention and control strategies. This Special Issue aims to address the epidemiology of leishmaniasis, as well as theoretical and practical studies concerning prevention and control measures and tools used to define risk areas that must take priority when tackling the spread of the disease.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
