Special Issue

Recent Advances in Snakebite Envenoming Research

Message from the Guest Editor

Snakebites are becoming a noticeable health problem after many years as a forgotten problem. Snakebites occur anywhere where snakes live; however, the effect of snakebites is felt in areas where neglected populations live and have to coexist with precarious environmental and social conditions and limited access to healthcare. Through this Special Issue, we will have researchers from different health disciplines reporting their own findings and perspectives around snakebites and the impact. Snakebites, especially venomous snakebites, constitute a clinical emergency but also a social call of attention to people's needs in terms of their lack of housing, working conditions, and access to health services, all of which are risk factors increasing the likelihood of these encounters. This is a multidisciplinary field in which Clinicians, Public Health Professionals, and Epidemiologists can have a say in the prevention and management of the snakebites. This Issue is an opportunity to look at the problem through multiple perspectives and will contribute to the research conducted to unveil the repercussions of snakebites in human society.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
