

## Special Issue

# Contemporary Migrant Health

### Message from the Guest Editor

This Special Issue of the journal seeks contributions from authors who can advance understanding and knowledge on current and future challenges in promoting the agenda of health for refugee and migrants, gaps, new priorities and opportunities. We are especially interested in papers that describe innovative practices, replicable models, new policy development, cross-sector partnerships and frameworks for cooperation, across the spectrum of human rights, sustainable development, public health, disease control, climate change, research, etc., as they relate to health and migration. We welcome any other contributions able to advance understanding on regional-specific challenges and priorities, migrant vulnerable groups, disease-specific contexts and approaches, the place health of migrants has in global processes, such as the implementation of the Global Compacts for Refugees and Migrants, the advancement of UHC, the new commitments to address climate and environment changes, and the fight against COVID-19 and future pandemics.

---
