Leaving No One Behind: The Prevention and Treatment of HIV Among Key and Vulnerable Populations

Message from the Guest Editors

This Special Issue focuses on HIV prevention and treatment among key and vulnerable populations (KVPs). Despite a 60% reduction in HIV incidence since 1995, KVPs remain critical for epidemic control. In 2023, 1.3 million new infections occurred, with 44% in women and girls. While global adult HIV prevalence is below 1%, KVPs face higher rates—including adolescent girls/young women (15–25) in eastern/southern Africa, gay men/men who have sex with men, sex workers, people who inject drugs, transgender individuals, and prisoners. Their uptake and adherence to HIV treatment also lag behind the general population. Enhancing evidence on strategies to boost KVPs' use of prevention methods and improve treatment uptake/adherence is vital. We welcome articles on KVPs' knowledge, perceptions, attitudes, and experiences regarding HIV prevention/treatment; strategies/policies to address these; and new prevention/treatment drugs. Contributions may include opinion pieces, qualitative/quantitative/mixed-methods research, scoping reviews, literature reviews, systematic reviews, meta-analyses, meta-syntheses, and editorials.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.2 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2025).
