

Special Issue

Toxoplasma gondii: Epidemiology, Clinical Challenges, and Case Insights

Message from the Guest Editors

Since its discovery in 1908, the protozoan *Toxoplasma gondii* has become one of the most widespread parasites globally. Moreover, *T. gondii* is considered one of the most successful and well-adapted parasites due to its ability to spread within all ecosystems and across different hosts (humans and domestic and wild animals and birds) and to infect different types of cells.

Approximately 2 billion people worldwide are chronically infected with *T. gondii*, and toxoplasmosis is one of the most damaging zoonotic diseases in the world, with a loss of 2–8 million disability-adjusted life years. To better mitigate the potentially devastating impact of *T. gondii* on humans, we need to better understand and identify effective actions and develop strategies to reduce the burden of this parasitic disease.

This Special Issue will showcase recent research related to various aspects of *Toxoplasma gondii* infection, including epidemiology, risk factors, and patterns of distribution.

We look forward to receiving submissions of reviews, original research articles, case reports, and case series and contributing to the development of effective prevention and control measures.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
