

## Special Issue

# Beyond Borders—Tackling Neglected Tropical Viral Diseases

### Message from the Guest Editor

This Special Issue aims to explore innovative strategies, research, and collaborative efforts specifically focused on neglected tropical viral diseases. We invite contributions that delve into neglected tropical viral diseases (dengue, Zika, chikungunya, yellow fever, and other related infections). We invite submissions that aim to do the following:

- Explore the epidemiology of neglected tropical viral diseases and emphasize cross-border collaboration;
- Share advancements in diagnostic tools, antiviral therapies, and vaccine development;
- Discuss vector-borne viral NTDs and effective approaches to control mosquito populations;
- Highlight community-based programs that raise awareness, promote preventive measures, and empower local populations;
- Explore the impact of climate variability on disease transmission and adaptation strategies;
- Share successful examples of international collaboration in tackling viral NTDs.
