

# Special Issue

## Advances in *Brucella* Infections

### Message from the Guest Editors

*Brucella* species are among the most important zoonotic pathogens, causing significant human disease and major livestock losses. These facultative intracellular bacteria invade host cells, persist intracellularly, and evade immune responses, resulting in chronic infections. Recent advances have deepened understanding of *Brucella* physiology, metabolism, and host interactions, enabling improved diagnosis, treatment, and prevention. The Special Issue seeks original research, reviews, and perspectives covering all aspects of *Brucella* infection and biology, from basic to translational and applied studies. **Topics of interest:** physiology, metabolism, genetic diversity; invasion, intracellular survival, persistence; virulence factors and immune evasion; host innate and adaptive immunity; novel vaccines; diagnostics and biomarkers; pathogenesis; epidemiology, transmission, OneHealth; treatment and control. Contributions that highlight recent advances to combat this zoonotic disease are welcome.

---

### Guest Editors

Dr. Mariana Cristina Ferrero

Dr. Jorge C. Wallach

Dr. Pablo C. Baldi

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
