

## Special Issue

# Emerging and Re-emerging Infectious Diseases: Global and Local Burden, Surveillance, and Response Strategies

### Message from the Guest Editors

The aim of this Special Issue is to explore the complexity of these diseases, analysing recent developments, trends and case studies both locally and globally. Contributions may range from new discoveries on emerging pathogens to changes in disease patterns and factors favouring the return of previously under-control infections. It will be focused on epidemiological studies, innovative control and prevention strategies and the impacts of several factors such as climate change, urbanisation and migration. The ultimate goal of this collection is to create a platform for dialogue between researchers, health professionals and policymakers, promoting collaborations and effective strategies to mitigate the impact of these diseases locally and globally.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
