

Special Issue

Advances in Dengue and Other Arboviral Diseases

Message from the Guest Editor

In this Special Issue we invite submissions relating to changing patterns of clinical disease and disease epidemiology of these and other regionally relevant mosquito-borne viruses. We are particularly interested in original research that deals with the prevention and treatment of these diseases; examples include research into the biological control of vectors, potential vaccine candidates and therapeutic drugs. Papers dealing with host and environmental factors in determining disease outcome, including molecular mechanisms of diseases, are welcomed. Clinical observations that provide new insights into clinical manifestations or changing disease patterns are also welcome. Changes in the epidemiology of these diseases (e.g., the appearance in a new country or region) will be of interest to our readership. Research relating to diagnosis—particularly new methods, including point-of-care testing—is also within the scope of this Special Issue. Review papers will be considered, particularly if they are registered systematic papers using PRISMA or PICO formats.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
