Special Issue

Respiratory Infectious Disease Epidemiology and Control

Message from the Guest Editors

Respiratory infectious diseases pose a significant global health burden. The data on the recent COVID-19 pandemic have raised several research questions at various levels of infectious disease epidemiology and modeling. At the parametric level, it is highlighted about the improvement in the inference of epidemiological parameters and their time-varying characteristics across the outbreak's span. Such temporal parametric information could allow us to assess the impacts of these PHSMs better and, thus, provide better real-time intervention policies. Furthermore, the epidemiological dynamics and the characteristics of these respiratory viruses would be interesting to assess during the post-COVID-19 pandemic period, accounting for their coexistence and co-circulation.

In this Special Issue, we welcome submissions of studies covering topics including, but not limited to, the epidemiology and transmission dynamics of these respiratory diseases and their control strategies, impact assessments of these interventions, predictions of population immunity, and the dynamics and disease burdens of these respiratory viruses during the pre- and post-COVID-19 pandemic periods.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
