

## Special Issue

# Tuberculosis Diagnosis: Current, Ongoing and Future Approaches

### Message from the Guest Editor

This Special Issue aims to focus on traditional diagnostic methods, which, despite their limitations, remain widely used in many regions. We also aim to explore the integration of molecular diagnostics, which have improved the sensitivity and specificity of TB detection. This Special Issue also aims to focus on the challenges faced in resource-limited settings and the need for diagnostics that can address drug-resistant TB strains. The potential of multiomics approaches and the discovery of theranostic markers for personalized treatment regimens will also be explored, thereby emphasising the importance of aligning diagnostic advancements with shorter TB drug regimens and improving healthcare delivery systems to ensure the uptake of new technologies. Contributions to this Special Issue should aim to provide a platform for discussing the current state and future prospects of TB diagnostics. The ultimate goal is to ensure that diagnostic advancements are accessible and applicable across diverse healthcare settings, thereby improving TB management and outcomes worldwide.

### Guest Editor

Dr. Philippa J. Randall

1. Department of Medicine, University of Cape Town, Cape Town 7925, South Africa
2. Antrum Biotech, Old Main Building, Groote Schuur Hospital, Observatory, Cape Town 7925, South Africa

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
