

## Special Issue

# Emerging and Reemerging Zoonotic Diseases: From Past Lessons to Future Preparedness

### Message from the Guest Editor

Zoonosis denotes any disease or infection naturally transmissible from vertebrate animals to humans. Notably, its hazards are being amplified by global ecological upheaval. Pathogens that once circulated quietly in wildlife reservoirs now breach species barriers with accelerating frequency, propelled by climate shifts, habitat fragmentation, and intensified livestock production. This Special Issue, “Emerging and Reemerging Zoonotic Diseases: From Past Lessons to Future Preparedness,” interrogates these networks across historical, contemporary, and predictive dimensions. We invite research that deciphers past spillover events through archaeological, archival, and genomic reconstructions; elucidates molecular mechanisms driving host jumps; maps land-use and climate drivers of current hotspots; and evaluates One Health governance, AI-driven surveillance, and vaccine innovations. By integrating virology, ecology, veterinary science, social sciences, and Indigenous knowledge, the collection aims to translate retrospective insight into anticipatory, equitable, and climate-resilient strategies that safeguard both human and planetary health.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.2 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2025).
