Highlights in Infective Endocarditis

Message from the Guest Editors

Infective endocarditis (IE), a life-threatening disease affecting the heart, has shown a growing global incidence, particularly among individuals over 60 in developed countries. Considering the diverse range of factors in older patients, multidisciplinary endocarditis teams have been established based on guidelines from the European Society of Cardiology and the American College of Cardiology/American Heart Association since 2023. This is why we invite submissions for our Special Issue on IE management, encompassing topics such as epidemiology, etiology, diagnosis, and management strategies. We welcome contributions from various experts including infectious disease physicians, microbiologists, epidemiologists, cardiologists, cardiac surgeons, geriatricians, pharmacists, and radiologists. We encourage comprehensive reviews, original articles, case reports, and short communications. All submissions will undergo peer review and processing charges may apply. Let us unite in our mission to decrease the morbidity and mortality rates associated with this cardiovascular infection and transform the landscape of IE management.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
