

Special Issue

Contemporary Migrant Health, 2nd Edition

Message from the Guest Editor

We invite your continued contributions to this Special Issue of the Journal, which is aimed at advancing understanding and knowledge regarding the current and future challenges involved in promoting this agenda of the health for refugees and migrants. We are particularly interested in papers that describe innovative practices, replicable models, new policy developments, cross-sector partnerships, and frameworks for cooperation across various domains. We welcome all contributions that enhance our comprehension of regional- and country-specific challenges and priorities, the circumstances of vulnerable migrant groups, disease-specific contexts and approaches, the role of migrant health in global processes such as the implementation of the Global Compacts for Refugees and Migrants, the advancement of UHC and SDGs relevant in addressing migrants' social determinants of health, commitments to address climate and environmental changes, and the battle against COVID-19 and potential future pandemics. Your insights and research are invaluable in shaping a more inclusive and equitable healthcare landscape for refugees and migrants worldwide.
