

## Special Issue

# Microbial Infections and Antimicrobial Use in Neonates and Infants

### Message from the Guest Editor

Despite the important technological advances and the improvement in the level of care, which have led to a significant increase in survival among neonates, infections/sepsis are still in third place for prevalence, incidence, and cause of death among newborns. The importance of focusing attention on the microbial infections in the neonatal population is therefore evident. The goal of the Special Issue entitled “Microbial Infections and Antimicrobial Use in neonates and infants” is to compile an up-to-date collection of original research and review articles related to clinical presentation, diagnostic challenges, and treatment of various microbial infections, as well different aspects of antimicrobial use, such as antibiotic stewardship and pharmacodynamics/pharmacokinetic of antimicrobials in neonates.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
