Special Issue

Surveillance, Modelling, and Risk Mapping of Tropical Infectious Diseases

Message from the Guest Editors

Toxoplasma gondii and Neospora caninum are globally distributed protozoan parasites posing significant health challenges. In tropical regions, unique epidemiological, environmental, and socio-cultural factors, coupled with warm climates, diverse hosts, and often limited control measures, exacerbate their persistence and profound impact on human and animal health. T. gondii is a leading cause of foodborne zoonoses and congenital infections, while *N. caninum* causes major reproductive losses in livestock. This Special Issue invites cuttingedge research and comprehensive reviews on the epidemiology, pathogenesis, diagnosis, prevention, and control strategies for these protozoa, with a specific focus on tropical regions. We particularly welcome contributions highlighting One Health approaches, molecular/serological surveillance, wildlife reservoirs, socio-cultural risk factors, and innovative interventions tailored to tropical contexts. By integrating multidisciplinary perspectives, this collection aims to advance understanding and provide actionable insights to reduce the burden of these infections on human and animal populations in the tropics.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
