

Special Issue

Burden of Tuberculosis in Different Countries

Message from the Guest Editors

This Special Issue focuses on the burden of TB in different countries with a special focus on areas where the incidence rate or other measures of burden is high per se, or in comparison to other districts, regions or areas close by. Although articles regarding large geographical areas with high measures of burden will be welcomed, we are particularly interested in more nuanced reports of smaller, well-defined places with high burdens, and the hypotheses/evidence around reasons why. A broad range of research methodologies will be accepted, including qualitative, epidemiology, operational, implementation, modelling, and policy research, as well as other relevant approaches.

Guest Editors

Dr. Mareli Claassens

Dr. Graeme Hoddinott

Dr. Cari van Schalkwyk
