Globalization and Infectious Diseases

Message from the Guest Editor

As the world becomes more and more connected pathogens are finding their way into new populations. At the same time the shifting ecology of our planet has provoked the incursion of novel infections into the human family. In response new and innovative global disease detection and control systems are under implementation to combat the globalization of infection and prevent pandemics. This edition will look at the main drivers of these interlocking trends through evidence based analytic papers. The final optic of the volume will be an interdisciplinary view of the globalization of human infection and the scaling of public health response to meet the challenge.

- Factors of emergence of new human infections
- Travel, Trade
- Land Use, ecological change
- Population pressure
- Zoonotic spillover
- Microbial Change—antimicrobial resistance
- Global Infectious Disease surveillance & detection
- Innovative diagnostics and their diffusion
- Regional and global surveillance networks
- Event based surveillance
- Antibiotic stewardship
- “One Health” and “Planetary Health” paradigms
- “Hot Spots” defined and alignment of program

Guest Editor

Dr. Ann Marie Kimball

1. Senior Consulting Fellow, Chatham House, London, UK
2. Professor Emerita, School of Public Health, University of Washington, Washington, DC, USA

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
