Special Issue

Advances in Vector-Borne Diseases: Celebrating the First Impact Factor of TMID and in Memory of Sir Patrick Manson (1844-1922)

Message from the Guest Editors

Based on the 2020 WHO data, vector-borne diseases account for more than 17% of all infectious diseases, causing more than 700,000 deaths annually. Major outbreaks of dengue, malaria, chikungunya, yellow fever, and Zika have afflicted populations, claimed lives, and overwhelmed health systems in many countries. Tropical Medicine and Infectious Disease will receive its first Impact Factor this year. To celebrate this momentous occasion, we have decided to set up a Special Issue on 'Advances in Vector-Borne Diseases' in commemoration of the 100th anniversary of the death of Sir Patrick Manson, one of the founding fathers of tropical medicine. We call on the community to review the efforts of scientists in overcoming the difficulties of vector-borne diseases and to examine the latest research progress in the field. This Special Issue also celebrates the 30th anniversary of the establishment of The Australasian College of Tropical Medicine, emphasizing the role of Tropical Medicine and Infectious Disease as the official journal of the College since 2016.

Guest Editors

Prof. Dr. John Frean

Prof. Dr. Peter A. Leggat

Dr. Brice Rotureau

Prof. Dr. Santiago Mas-Coma

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
