

## Special Issue

# The Past and Present Threat of Rickettsial Diseases

### Message from the Guest Editor

Tropical rickettsial illnesses are severely neglected tropical diseases of substantial impact on both rural and urban populations. For scrub typhus, all countries with established surveillance systems report increasing minimum incidence rates over the past decade. For murine typhus, an equally important and even more neglected disease with a more urban distribution, a lot of clinically relevant information on the natural history, disease burden, diagnostics and pathogen characterisation are lacking. Scrub typhus and murine typhus together are responsible for a substantial proportion of undiagnosed febrile illnesses in humans in many parts of the tropics. In this Special Issue, we invite the submission on the currently relevant aspects of tropical rickettsial illnesses—with emphasis on diagnostic developments, epidemiology, fever studies, bacterial virulence, genomics and potential antimicrobial resistance issues—aiming at improving the awareness and understanding of physicians and researchers alike, about these neglected but important diseases.

### Guest Editor

Prof. Dr. Daniel H. Paris

1. Nuffield Department of Medicine, University of Oxford, UK
2. Mahidol–Oxford Tropical Medicine Research Unit (MORU), Faculty of Tropical Medicine, Mahidol University, 3rd Floor, 60th Anniversary Chulalongkraj Building, 420/6 Ratchawithi Rd., Ratchathewi District, Bangkok 10400, Thailand
3. Swiss Tropical and Public Health Institute, Basel, Switzerland
4. University Basel, Basel, Switzerland

### Deadline for manuscript submissions

closed (31 May 2018)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Lab, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

##### Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
