Special Issue

Tracking Infectious Diseases

Message from the Guest Editor

This Special Issue on "Tracking infectious diseases" aims to focus on methodological theories of tracking technology (e.g., statistical and mathematical modeling, machine learning and evolutionary algorithms, geospatial informatics, communication infrastructures, micro-sensors, mobile data, etc.) for disease control and their applications and ethical concerns for tracing the source of infection, and identifying the transmission risk of infectious disease, with the goal to build scientific understanding on how the improvement of tracking technology can provide valuable insights in disease surveillance and detecting emerging disease clusters in time and space. We encourage the submission of original research, in the form of innovative and unconventional applications of methodological, technological, administrative or ethical perspectives on tracking infectious diseases, for example, data analytics in outbreak detection and disease control, developing new algorithms for predicting epidemic progression, Artificial Intelligence of Things (AloT) in disease surveillance, environmental exposure assessment, and best practices in disease tracking.

Guest Editor

Dr. Tzai-Hung Wen

Department of Geography and Institute of Epidemiology and Preventive Medicine, National Taiwan University, No. 1, Sec. 4, Roosevelt Road, Taipei, Taiwan

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. John Frean

Pathologist, Parasitology Reference Laboratory, Centre for Emerging Zoonotic and Parasitic Diseases, National Institute for Communicable Diseases, University of the Witwatersrand, Johannesburg 2192, South Africa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases.

Journal Rank:

JCR - Q1 (Tropical Medicine) / CiteScore - Q2 (Public Health, Environmental and Occupational Health)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2025).
