

Special Issue

Travel Health

Message from the Guest Editor

This Special Issue will cover a wide range of common health issues and emerging travel-related diseases, with emphasis on the prevention and control of these problems for travellers. Health issues related to a diverse range of travellers and travel settings will be considered, including: migrants and refugees; access to travel health; vaccine hesitancy; visiting friends and relatives; backpacking travellers; non-governmental organisations; aid workers, missionaries, expatriates and volunteers; long-term travellers; business travellers; medical tourism; VIP travellers; military travellers; cruise travel; mass gatherings; expedition trips; returning travellers; and last-minute travellers. Relevant original research articles (including trials), systematic or integrative reviews, and case series are welcome. Some case reports of rare, emerging or re-emerging diseases (e.g., monkeypox) may also be considered.

Guest Editor

Dr. Harunor Rashid
