Deadline for manuscript
submissions:

closed (1 September 2021)

Message from the Guest Editor

Dear Colleagues,

Undoubtedly, the first detection of gravitational waves on 14 September 2015 was a momentous achievement in science. In the case of gravitational waves, this shows not only the power of the theory but also the tremendous advances in technology that had to occur to make this happen.

The phenomenon of gravitational waves has always been a driving force in the efforts to explore and understand the theoretical and mathematical foundations of Einstein's theory of gravitation and in the development of new experimental techniques. They have also been a strong motivation for the creation of modern computational methods for solving Einstein's equations. Yet, we are still left with questions: how do we describe gravitational waves and the energy-momentum they carry in cosmological space-times? What is their role in the very early universe? How do we model concrete sources for them...

Thus, gravitational waves are central to current developments in gravitational physics. For more information, please visit: mdpi.com/si/60221.

Special Issue

universe

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari, Italy

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
