## Quantum Dynamics and Applications

Guest Editors:

**Prof. Dr. Shumpei Masuda**

College of Liberal Arts and Sciences, Tokyo Medical and Dental University, Ichikawa, Chiba 272-0827, Japan

**Dr. Kuan Yen Tan**

Department of Applied Physics, Aalto University, Espoo, Finland

**Prof. Dr. Mikio Nakahara**

Department of Mathematics, Shanghai University, Shanghai 200444, China

Deadline for manuscript submissions:

**closed (15 October 2019)**

### Message from the Guest Editors

Quantum technologies are a rapidly emerging field. Many countries and large corporations are ramping up their investment in quantum technology, particularly in quantum information processing. However, these systems require extremely fast and precise controls because, over time, quantum systems lose their “coherence”, which refers to the ability to make interference and superposition of states. Maintaining this “coherence” is at the heart of all the mechanisms utilized in quantum technology. Therefore, the key to the further advancement of quantum technology relies on fast and accurate quantum control protocols. However, finding an optimum temporal and spatial dependence of the control field for high-speed manipulations is extremely challenging because fast controls require a strong control field, which can easily cause undesirable perturbation to the system, thus, negating its useful superposition.

This Special Issue not only focuses on practical purposes, but also aims to deepen the understanding of the world from the perspective of high-fidelity quantum control.

**Keywords:** Fast and accurate quantum control; Quantum dynamics; Quantum technology

## Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
