Message from the Guest Editors

Dr. Francesco De Paolis

Dear Colleagues,

Prof. Dr. Alexander F. Zakharov Dear concagaes

Prof. Dr. Achille Nucita

Relativistic Astrophysics is the branch of astrophysics that studies astronomical phenomena and celestial bodies, for which classical mechanics and Newton's law of gravitation are inapplicable. The field of relativistic astrophysics began with Schwarzschild's solution and still continues to grow very rapidly, a century on since the birth of general relativity theory.

Deadline for manuscript submissions:

The main aim of this Special Issue is to review recent progress in the field of relativistic astrophysics and to point out future perspectives. [...]

Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Astronomy & Astrophysics*) / CiteScore - Q2 (*General Physics and Astronomy*)
