

Special Issue

Stellar Astrophysics, 2nd Edition

Message from the Guest Editor

This Special Issue will cover a number of subjects, which are as follows:

- The life cycle of stars;
- Brown dwarfs and hot Jupiters;
- Endpoints of stellar evolution;
- Evolution of stars in binary systems;
- Planetary systems in the galaxy;
- Stellar explosions, novae and supernovae, and stellar winds;
- Stellar magnetic fields;
- Black holes and neutron stars;
- Star formation across cosmic time;
- Stellar dynamics and the galactic structure;
- Mapping the galactic stellar populations with Gaia;
- Star formation in starburst galaxies;
- Stellar associations—open clusters and globular clusters;
- Observational facilities and techniques;
- Multi-wavelength synergies;
- Stellar astrophysics with future facilities;
- Gravitational waves from compact stellar systems.

Guest Editor

Prof. Dr. Roberto Mignani

INAF, Institute for Space Astrophysics, 20133 Milan, Italy

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
