

Special Issue

Propagation of Coronal Mass Ejections

Message from the Guest Editors

Coronal mass ejections (CMEs) and their associated shocks are one of the main drivers of heliospheric variability and cause interplanetary as well as planetary disturbances. Therefore, understanding and forecasting their propagation is an extremely important aspect of solar and heliospheric physics and space weather. This Special Issue is devoted to studies covering various topics related to the propagation of CMEs, including but not limited to deriving reliable observation-based input, new observational techniques and methods, and new or advanced modeling efforts and evaluation. We solicit contributions on observational and modeling efforts, as well as case studies, particularly encouraging multispacecraft studies.

Guest Editors

Dr. Mateja Dumbović

Hvar Observatory, Faculty of Geodesy, University of Zagreb, Kacicева 26, HR-10000 Zagreb, Croatia

Dr. Fang Shen

State Key Laboratory of Space Weather, National Space Science Center (NSSC), Chinese Academy of Sciences, Beijing 100190, China

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
