Supernova Remnants in the Multi-Wavelength Era

Message from the Guest Editor

With the advent of new missions such as JWST and XRISM, and existing missions such as Chandra and HST continuing to produce exciting and novel results, we are living in a golden age for supernova and supernova remnant science. In this Special Issue, we aim to provide an overview of the advances that have been and can be made in this era of multiwavelength observations of supernova remnants and address questions that can be answered with regard to the complex connections between supernova remnants and their progenitors. Both reviews and original content will be considered for this Special Issue. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
