

Special Issue

IR Quantum Gravity, Theoretical Challenges and Cosmological/Astrophysical Consequences

Message from the Guest Editors

We invite colleagues to submit contributions to this Special Issue on “IR Quantum Gravity, Theoretical Challenges, and Cosmological/Astrophysical Consequences” of the journal *Universe*, addressing both theoretical and phenomenological aspects concerning:

- IR quantum gravity and non-perturbative functional renormalization group flow;
- IR perturbative corrections to the gravity sector;
- IR and UV scale interconnection;
- IR corrections and cosmological consequences, inflation, large scale structure, dark energy, etc.;
- IR corrections and astrophysical consequences, black holes, supernovae, galactic rotational curves, etc.;
- IR corrections to the gravity sector and gravitational waves;
- UV to IR passage and explanation of decoherence, physical interpretation of the “collapse of the wave function”.

Guest Editors

Prof. Dr. Vasilios Zarikas

1. School of Engineering, Nazarbayev University, Astana 010000, Kazakhstan
2. Theory Division, General Department, University of Thessaly, 382 21 Volos, Greece

Dr. Pantelis S. Apostolopoulos

Assistant Professor, Mathematical Physics and Computational Statistics Research Laboratory, Department of Environment, Faculty of Environment, Ionian University, 49100 Corfu, Greece

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
