

# Special Issue

## Probing the Quantum Space-Time

### Message from the Guest Editors

It is the goal of this Special Issue to collect recent results probing the nature of quantum space-time, independent of which approach to quantum gravity they arise from. We especially welcome contributions that propose new observables in quantum gravity, and can thus facilitate connections and comparisons across approaches, and tools that help us unlock and examine new features of space-time at the smallest scales. For more information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
