Numerical Studies of Strongly Coupled Gauge Theories (SCGTs) in the Search of New Physics

Message from the Guest Editors

This Special Issue focuses on the latest developments in numerical studies of SCGTs in the context of BSM physics, ranging from novel simulation techniques, formulation and algorithms to phenomenological consequences of BSM candidates such as dark matter spectroscopy and near-conformality. You are invited to submit contributions to this Special Issue with both original and review articles.

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.
