

Special Issue

Gravitational Waves: Prospects after the First Direct Detections

Message from the Guest Editor

We invite colleagues to submit contributions to the Special Issue, "Gravitational Waves: Prospects after the First Direct Detections", of the journal *Universe*, addressing both theoretical and observational aspects concerning the

- first direct detections of gravitational waves,
- future gravitational wave experiments,
- strong-field gravitational waves in the geometrical optics approximation,
- backreaction of gravitational waves,
- gravitational waves as exact solutions of the Einstein equations,
- gravitational waves in modified gravity theories,
- observational and theoretical constraints on the speed and polarizations of gravitational waves,
- astrophysics and cosmology with gravitational waves,
- electromagnetic and high-energy cosmic ray counterparts of gravitational waves.

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
